

2020 SOUTH DAKOTA PIPELINE ASSOCIATION EMERGENCY RESPONSE EXERCISE

TACTICAL PIPELINE RESPONSE TRAINING

NEW DISCUSSION BASED SCENARIO EXERCISES

- Receive updated information and build relationships with your local pipeline operators

Local Government Officials

- Do we have a pipeline emergency?
- Where is the leak or response?
- Whom do we notify?
- Is there an immediate threat to life or property?
- Should emergency responders shut down the pipeline?
- Do we need to start an evacuation or other public protective action?
- Will other resources (local, state, federal, private industry) be required?

AGENDA

Lunch Meetings

- 11:30 am Registration
- 11:45 am Pipeline Safety Program
- 1:30 pm Door Prizes

Dinner Meetings

- 5:30 pm Registration
- 5:45 pm Pipeline Safety Program
- 7:30 pm Door Prizes

For questions or additional information, contact us at (877) 477-1162 or visit our website at sdpa.pipelineawareness.org

Please post on bulletin board and encourage attendance. Attendees will be entered into a drawing for a \$250 regional award. Additional drawings for 4 \$25 Gift Cards will be awarded at each meeting as well.

Meetings subject to change. Please visit sdpa.pipelineawareness.org for updates and to learn more about your local pipeline operators.

ADDITIONAL PIPELINE INFORMATION

HOW WOULD YOU KNOW WHERE A PIPELINE IS?

Most pipelines are underground. Pipeline rights-of-way are clearly identified by pipeline markers along pipeline routes.

Pipeline Markers

- Identify the approximate—NOT EXACT—location of the pipeline.
- Every marker contains information identifying the company that operates the pipeline, the product transported, and a phone number that should be called in the event of an emergency.
- Markers do not indicate pipeline burial depth, which will vary.
- Markers are typically seen where a pipeline intersects a street, highway or railway.
- It is a federal crime for any person to willfully deface, damage, remove, or destroy any pipeline marker.

RECOGNIZING A PIPELINE LEAK

Sight:

- Liquid pools
- Continuous bubbling in wet or flooded areas
- Oily sheen on water surfaces
- Vaporous fogs or blowing dirt around a pipeline area
- Dead or discolored plants
- Frozen ground in warm weather
- Natural gas:
 - Colorless
 - Vapor and “ground frosting” may be visible at high pressures.
- Natural gas leaks:
 - Indicated by dust blowing from a hole in the ground
 - Flames if the leak is ignited.

Sound:

- Quiet hissing to a loud roar depending on the size of the leak and pipeline system.

Smell:

- An unusual smell, petroleum or gaseous odor.
- Natural Gas and Highly Volatile Liquids (HVL) Colorless, tasteless and odorless unless odorants, such as Mercaptan, is added.

Most HVLs contain a slight hydrocarbon or pungent odor. Most are non-toxic; however, products such as ammonia are considered a toxic chemical and can burn the senses. If inhaled HVLs may cause dizziness or asphyxiation without warning.

IDENTIFIED SITE REGISTRY

Pipeline operators need your help keeping people and property safe.

Identified Sites - locations where many people occupy an area near a pipeline asset or facility. These are places where people may gather from time to time for a variety of reasons.

Some of these sites are very difficult for companies to obtain without help from those with local knowledge of the area.

Pipeline operators are required by law to work with public officials who have safety, emergency response, or planning responsibilities that can provide quality information regarding identified sites.

Please visit our website to learn more about the identified sites registry.

PIPELINE EMERGENCY RESPONSE TRAINING

See Schedule Inside

1 Register your company at rsvp.pdigm.com

• All employees can attend

2 At the program you will receive:

• Up to date pipeline materials with contact information
• Communication from your local pipeline operators
• Free meal and new pipeline safety training

More pipeline operators and first responders attend these programs than any other pipeline safety program in the nation.
